

# Bolfresh<sup>®</sup> Perforated Films

## High Breathability Polyolefin Films

Bolloré's extensive range of perforation is adapted for the packaging of fruits & vegetables, cheese and variety of baked goods.

- Perforations, with varying number of holes and dimension to determine WVTR rate.
- Excellent machinability.
- Designed for food contact.

Perforations are not grade specific - average values independent of base film type.

Contact us for your specific requirements.
