Letter of Continuing Guarantee - BCL

BCL shrink films, as supplied by Bolloré Incorporated, are guaranteed to comply with, and are not adulterated or misbranded within the meaning of all relevant US Federal Food, Drug and Cosmetic Act (FFDCA) requirements.

Specifically, BCL grade films comply with FDA regulation 21 CFR 177.1520 – Olefin polymers, allowing direct contact with food products (including meat and poultry), except for use in holding food products during cooking. Non-printed BCL films are suitable for microwave heating.

Additionally, BCL grade films have received a letter of no objection from CFIA (Bureau of Chemical Safety, Food Directorate, Health Canada) under the following conditions:

The subject films are intended to be used in direct contact with fresh & frozen pizzas, baked goods, sausages, processed meats, fruits and vegetables. The food will be packaged under chilled or frozen conditions. Food will be stored or displayed refrigerated or frozen. Films will be removed before cooking.

BCL shrink films:

- comply with Part B Division 23 of the Canadian Food and Drug Regulations,
- do not contain any intentionally added lead, hexavalent chromium, cadmium or mercury or a combined concentration of lead, hexavalent chromium, cadmium or mercury of 100 or more milligrams per kilogram,
- do not contain any Bisphenol A (BPA)

We further certify that all shrink films are made using Good Manufacturing Practices and have passed all internal quality control tests with lots coded for component tracking. Production and distribution facilities comply with ISO9001:2008 (product quality) and ISO22000:2005 (food safety) requirements, and are regularly audited and certified by outside parties for compliance.

Sincerely,

Charles O'Lari
Manager – Quality/Safety/Environment
